**EM Protective clothing**

**Technical Datasheet**

**Electromagnetic radiation protective clothing**

*Protection for people with EMI/RF sensitivity or for people who are exposed to large amounts of EM radiation*

Holland Shielding Systems BV Anti-EMI/RF E-Smog personal protection is functional, effective shielding against electromagnetic fields. This shielding clothing may be worn while working in an environment with high electromagnetic radiation but can also be used for personal protection against electromagnetic radiation.

This EMI/RF shielded clothing is made of the same material as our Faraday tents, is very strong and can easily be washed.

The electromagnetic radiation protective clothing can be made in any size and even according to your supplied drawings. Optionally, the clothing can be provided with pockets, gloves and/or face protection.

**Technical specifications**

Electromagnetic field shielding is created using the Faraday Cage principle and has been shown in testing to provide reductions in RF fields (non-ionizing radiation) of at least 90% in the frequency range of 800 MHz to 18 GHz.

**Shielding performance (dB)**

**Order example**

When you would like to order Electromagnetic radiation protective clothing specify the part number as follow:

- **Product**: Protective clothing
- **Size**: Large

Sizes

Small, Medium, Large, XLarge, XXLarge
