## **DIE-CUT GASKET 8300**

Gasket die-cut according to the client out of various materials, for example: silicone gasket, monel gasket, conductive rubber, conductive foam, neoprene

## COMBINER IP-EMC SEAL

Gaskets made out of conductive rubber are quite expensive and are also usually less soft than needed for the application. Due to excessive stiffness, the door or lid of the electronics housing will become warped or bent, which then causes electromagnetic leakage. Therefore we have developed gaskets which provide the same functionality while being significantly softer. Gasket size can be up to 2 x 3 meter and even bigger on request. Some examples are listed below.

- Round closed-cell neoprene gasket with soft conductive foam inside
- Neoprene gasket with conductive-rubber hollow O-ring profile

- Fabric over foam-gasket profile with asym-
- EMC/IP gaskets 7300 series (Amucor version) with cutouts for easy bending
- EMC/IP gaskets 7300 series with holes cut according to customer's drawing and with uninterrupted water seal
- Standard shield 7000 series with cutouts for easy bending

Die-cut gasket from profile (embossed Amucor foil)
